October 2016

Dear Parents,

Re: Doulton Road Development

Since the first communication work on site has started.

I would like to thank all parents whom have acted on our advice and parked safely away from the construction site.

From the 31st of October we have permission to close, and use part of the public footpath between the construction site and the school.

This is only a temporary measure to enable us to install drainage and construct new retaining walls.

The two gated entrances into the school will therefore be not available for use.

Please refer to the attached plan for alternative routes to take.

Over the next 6 weeks we shall be forming the new access road on site and installing drainage.

We shall be making direct drainage connections in Doulton Road. During this time traffic flow will be managed.

If you use Doulton Road to access the school please allow extra time for travel.

Yours Sincerely

For and on behalf of Kier Living Ltd
